Removal of Cancelled and Expired Trademark Registration Copies from the Files of the Trademark Search Library

As a result of a recent project to identify and remove cancelled and expired trademark registration copies from the files of the Trademark Search Library, the Patent and Trademark Office identified approximately 96,000 trademark registrations which do not appear in the TRAM or T-Search Systems and which are believed to be cancelled or expired. Unless evidence to the contrary is presented to the Office of the Assistant Commissioner for Trademarks within sixty (60) days of the publication date of this notice, the Patent and Trademark Office will take steps to remove all copies from the search file.

A listing of these registration numbers and their corresponding word marks is available for public inspection by appointment between the hours of 8:00 a.m. to 5:30 p.m. Monday through Friday at the Trademark Search Library, Crystal Plaza Building 2, 2011 Jefferson Davis Highway, Room 2C08, Arlington, Virginia. All persons interested in reviewing the listing should contact one of the Trademark Technical Information Specialists in the Trademark Search Library at (703) 557-0875 to arrange for an appointment.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. Section 8 Requirements For Trademark Registrations

Any registrant who files in the Patent and Trademark Office, on or after November 16, 1989, an affidavit or declaration under Section 8 of the Trademark Act will be required to comply with the requirements of the Trademark Law Revision Act of 1988 [Title I of Pub. L. 100-667, 102 Stat. 3935 (15 U. S. C. 1051)], which takes effect on November 16, 1989. The Trademark Law Revision Act amends 15 U. S. C. 1058(a) by adding the requirement that a registrant submit an affidavit "setting forth those goods or services recited in the registration on or in connection with which the mark is in use in commerce and attaching to the affidavit a specimen or facsimile showing current use of the mark...."

For Section 8 affidavits or declarations filed on or after November 16, 1989, the Patent and Trademark Office will require registrants to specify the goods and services to which the Section 8 affidavit or declaration pertains. The registrant may comply with the requirement for specification of its goods and services by listing each of the goods and services to which the Section 8 affidavit or declaration pertains or by making an all-encompassing reference to the goods and services recited in the registration (e. g., "*The mark is in use in connection with all the goods and services recited in the registration.*" or "*The mark is in use in connection with all the goods and services recited in the registration, with the exception of...*". The Patent and Trademark Office prefers that the registrant use an all-encompassing reference to its goods and services as the method of specification, especiallly where the mark is registered for numerous goods and services.

If the registrant fails to file, before the end of the sixth year following registration, a Section 8 affidavit or declaration that sets forth goods and services in connection with which the mark is in use, the registration will be cancelled. Similarly, those goods or services recited in the registration but not specified in a Section 8 affidavit or declaration filed before the end of the sixth year following registration will be deleted from the registration. After the end of the sixth year following registration, the Patent and Trademark Office will not accept a substitute Section 8 affidavit or declaration filed to correct registrant's failure to specify, or to specify completely, the goods and services on or in connection with which the mark is in use.

A Section 8 affidavit or declaration filed on or after November 16, 1989 must include a specimen or facsimile showing current use of the registered mark. The registrant will be required to file one specimen or facsimile for each class of goods or services to which the registration pertains. For a single-class registration covering multiple goods or services, only one specimen or facsimile showing current use of the mark on one of the goods or services in that class will be required. Similarly, for a mulitiple-class registration, the registrant will be required to file, for each class of goods or services covered by the multiple-class registration, one specimen or facsimile showing current use of the mark on one of the goods or services in that class.

If the registrant fails to file, before the end of the sixth year following registration, an affidavit or declaration that includes a proper specimen or facsimile for each class of goods or services to which the registration pertains, the registration will be cancelled as to that class of goods or services. After the end

of the sixth year following registration, the Patent and Trademark Office will not accept a substitute Section 8 affidavit or declaration filed to correct the omission of a proper specimen or facsimile.

Memorandum of Understanding Between the Patent and Trademark Office and the Animal and Plant Health Inspection Service

Agency: Patent and Trademark Office, Commerce
Action: Notice

Summary: The Patent and Trademark Office (PTO) is providing notice of a memorandum of understanding (MOU) between the PTO and the Animal and Plant Health Inspection Service (APHIS). The MOU establishes procedures whereby APHIS assists PTO in determining a product's eligibility for patent term extension under 35 U.S.C. 156, as amended by the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100-670, 102 Stat. 3971 (1988)). Procedures are also described for exchanging information between APHIS and PTO regarding regulatory review period determinations and the processing of due diligence petitions.
Date: The memorandum of understanding became effective June 15,1989.

Memorandum of Understanding
Between the
Patent and Trademark Office
and the
Animal and Plant Health Inspection Service

I. PURPOSE

This agreement establishes the procedures whereby the Animal and Plant Health Inspection Service (APHIS) assists the Patent and Trademark Office (PTO) in determining a product's eligibility for patent term restoration under 35 U.S.C. 156. It also establishes procedures for exchanging information between APHIS and PTO regarding regulatory review period determinations, due diligence petitions and informal APHIS hearings under the law.

II. BACKGROUND

The patent term restoration portion of the "Generic Animal Drug and Patent Term Restoration Act" of 1988 (the Act) (P.L. 100-670) was designed to create new incentives for research and development of certain products which are subject to premarket government approval. These provisions enable the owners of patents on certain animal drugs and veterinary biological products, and the owners of patents on methods of using or manufacturing such drug products, (as "drug product" is defines in the Act), to attempt to restore to the terms of those patents some of the patent time lost while awaiting premarket government approval.

Under the patent term restoration sections of the Act, a patent which claims a veterinary biological product that is subject to the Virus-Serum-Toxin Act (21 U.S.C. 151-159) and has been approved for marketing, or a method of using or manufacturing such a product, which has been approved for use, may qualify for patent term extension. Regardless of whether the patent claims a product, or a method of using or manufacturing a product, the applicant for a patent tern extension must establish that:

(1) the patent has not expired (35 U.S.C. 156(a)(1));
(2) the patent has never been extended (35 U.S.C. 156(a)(2));
(3) the application for extension is submitted by the owner of record of the patent or the owner's agent and includes details relating to the patent and regulatory review time spent in securing APHIS approval (35 U.S.C. 156(a)(3));
(4) the product has been subject to a regulatory review period within the meaning of 35 U.S.C. 156(g) before its commercial marketing or use (35 U.S.C. 156(a)(4));
(5) the permission for commercial marketing or use;
(A) is the first permitted commercial marketing or use of the product (35 U.S.C. 156(a)(5)(A)); or
(B) in the case of a veterinary biological product which has received permission for commercial marketing or use in both non-food-producing animals and food-producing animals, and has not yet been subject to a regulatory review period which is the basis for an extension in non-food-producing animals, the permission for commercial marketing or use of the product after the regulatory review period for use in food-producing animals is the first permitted commercial marketing or use of the product for administration to food-producing animals (35 U.S.C. 156(a)(5)(C)); and

(6) the application for extension of the term of the patent was submitted to PTO within 60 days of APHIS approval of the commercial marketing or use application (35 U.S.C. 156(d)(1)).

While it is the responsibility of the Commissioner of Patents and Trademarks (Commissioner) to decide whether an applicant has satisfied these six conditions, APHIS has certain direct responsibilities under 35 U.S.C. 156 for determining the length of the regulatory review period. Consequently, to facilitate eligibility decisions and permit APHIS and PTO to carry out their responsibilities under 35 U.S.C. 156, APHIS and PTO have entered into this agreement.

Under this agreement, APHIS, upon receipt of a written request from PTO, will inform PTO whether, with regard to eligibility for extension, a veterinary biological product has undergone a regulatory review period within the meaning of 35 U.S.C. 156(g) prior to commercialization. Under this agreement, APHIS will also, upon request by PTO and receipt of a copy of the application for patent term extension, determine the length of the regulatory review period for the approved veterinary biological product.

The procedures covered by this agreement extend from the date of PTO's request for information on eligibility to the resolution of due diligence petitions and informal hearings. The regulatory review period determination is not final until due diligence petitions and informal hearings, if any, have been resolved. A certificate for extension of the term of a patent may not issue from PTO until the regulatory review period determination is final, unless an interim extension appears warranted under 35 U.S.C. 156 (e)(2).

III. SUBSTANCE OF THE AGREEMENT: PATENT TERM EXTENSION APPLICATIONS UNDER 35 U.S.C. 156

A. Eligibility Determination Assistance
1. Upon deciding that a patent term extension application is complete and meets basic formal requirements, PTO will send a written request to APHIS requesting that APHIS:
a. verify whether the veterinary biological product was subject to a regulatory review period within the meaning of 35 U.S.C. 156(g) prior to its commercial marketing or use; and if so, whether it was the first permitted commercial marketing or use of the veterinary biological product for administration to a food producing animal; and
b. inform PTO whether the patent term restoration application was submitted within 60 days after the product was approved.
2. Additionally, PTO, in its written request, shall clearly state that it is not requesting determination at this time of the regulatory review period applicable to the product.
3. APHIS will consult its records and experts and, through Biotechnology, Biologics, and Environmental Protection (BBEP) will isssue a written response to the Deputy Solicitor of the PTO on each of these questions.
4. APHIS, upon written request, will also provide assistance to PTO in petitions before the Commissioner regarding eligibility determinations.

B. Regulatory Review Period Determinations
1. Should PTO decide that the veterinary biological product or method of using or manufacturing a product is eligible for patent term restoration, it will send APHIS a copy of the application for patent term restoration and a written request to determine the length of the applicable regulatory review period. The copy and request will be sent to APHIS within 60 days of the application's receipt by PTO.
2. APHIS will consult its records, determine the length of the applicable regulatory review period, and, through BBEP, issue a written statement of that determination to the Commissioner. Within 30 days after receipt of the application and written request from PTO, the determination will be made and APHIS will publish it in the *Federal Register*.

C. Due Diligence Petitions and Hearing Requests
1. Due diligence petitions must be filed at APHIS within 180 days after publication of the regulatory review period in the *Federal Registar*
a. If no due diligence petition is received by APHIS within the 180 day filing period, APHIS will promptly notify PTO in writing that the regulatory review period determination is final.
b. If a due diligence petition which satisfies statutory and regulatory requirements is received by APHIS:
(1) APHIS will promptly notify PTO in writing of the receipt of the petition;
(2) PTO will refrain from issuing a certificate of extension pending a final determination of the regulatory review period, unless an interim extension appears warranted under 35 U.S.C. 156(e)(2);
(3) APHIS will determine within 90 days after receipt of such a petition and will send written notification to the Commissioner as to any modification in the length of the regulatory review period; and
(4) APHIS will also publish its due diligence determination, together with the full factual and legal bases for its decision, in the *Federal Register*.
2. Requests for an informal hearing on APHIS's due diligence determination must be received by APHIS within 60 days of the publication of the due diligence determination in the *Federal Register*.
a. If APHIS does not receive any request for an informal hearing within the 60 day filing period, APHIS will notify PTO in writing that the regulatory review period determination, as modified, if at all, by the due diligence determination, is final.
b. If APHIS receives a request for an informal hearing within the 60 day filing period:
(1) APHIS will notify PTO in writing of the hearing request;
(2) APHIS will hold a hearing as prescribed under 35 U.S.C. 156(d)(2)(B)(ii);
(3) PTO will refrain from issuing a certificate of extension pending final determination of the regulatory review period unless an interim extension appears warranted under 35 U.S.C. 156(e)(2); and
(4) Within 30 days after completion of the hearing, APHIS will affirm or revise the determination that was the subject of the hearing, will notify the Commissioner in writing of any revision and whether the determination of the regulatory review period is now final, and will publish any revision in the *Federal Register*.

D. Supplemental Information
Should either agency receive information which is relevant to the patent term restoration of a patent during any stage of these eligibility or regulatory review period determinations, that agency will promptly notify the other and provide documentation as available.

E. Availability of Information
Copies of all letters required by this agreement and exchanged between PTO and APHIS will be placed in the file for each product subject to patent term restoration. These files are available for review at APHIS, Biotechnology, Biologics, and Environmental Protection, Rm. 850, 6505 Belcrest Road, Federal Building, Hyattsville MD 20782, and at the Patent and Trademark Office, Crystal Plaza Building 2-5C15, 2011 Jefferson Davis Highway, Arlington, Virginia 22202.

RIN: 0651-AA41

Exhaustion of Administrative Remedies in Patent and Trademark Office Disciplinary Proceedings

Agency: Patent and Trademark Office, Commerce
Action: Final Rule
Summary: This final rule sets forth amendments to 37 CFR §§ 10.155 and 10.157. The purpose of the amendments is to clarify that a respondent dissatisfied with the initial decision by the administrative law judge in a Patent and Trademark Office (PTO) disciplinary proceeding must exhaust available administrative remedies, i.e., appeal to the Commissioner of Patents and Trademarks, before seeking judicial review under 35 U.S.C. 32.
Effective Date: August 1,1989
For Further Information Contact: Harris A. Pitlick by telephone at (703) 557-4035 or by mail marked to his attention and addressed to Box 8, Commissioner of Patents and Trademarks, Washington, D.C. 20231.
Supplementary Information: It is possible that present rules may be interpreted not to explicitly require a respondent dissatisfied with the decision of the administrative law judge (initial decision) in a PTO disciplinary proceeding to file an appeal with the Commissioner of Patents and Trademarks as a condition precedent to filing a petition for review in the United States District Court for the District of Columbia under 35 U.S.C. 32.

Under 37 CFR § 10.154(a), in the absence of an appeal to the Commissioner, the initial decision, without further proceedings, becomes the decision of the Commissioner thirty (30) days therefrom. Local Rule 213 of the United States District Court for the District of Columbia, 37 CFR § 10.157 and 35 U.S.C. 32, together provide for review of the final decision of the Commissioner by a petition in that court within 30 days of the date of that decision. Thus, the rules could be construed to permit a respondent dissatisfied with the initial decision to bypass review by the Commissioner and directly seek judicial review within 60 days of the date of the initial decision.

The purpose of 37 CFR §§ 10.154-10.157 is to outline the steps for seeking review of an initial decision in a disciplinary proceeding. There is no provision for bypassing a determination by the Commissioner unless both parties accept the decision and do not desire any further review of the initial decision. Sections 10.155 and 10.157 have been amended to clarify that a respondent must exhaust available administrative remedies by appeal to the Commissioner before judicial review can be considered ripe.

Subsequent to a notice of proposed rulemaking setting forth the proposed amendments now adopted by this Final Rule, an amendment to 37 CFR § 10.156 was adopted. *See* 54 FR 6659 (February 14, 1989). Section 10.156 now explicitly permits the respondent or the Director to make a single request for reconsideration or modification of the Commissioner's decision on appeal from an initial decision. Nothing in that rule, or in the rules adopted by this Final Rule, requires a respondent dissatisfied with the Commissioner's decision to seek reconsideration thereof. Thus, a respondent dissatisfied with the Commissioner's decision may directly seek judicial review under 35 U.S.C. 32. In other words, for purposes of 37 CFR Part 10, exhaustion of administrative remedies is complete upon appeal to the Commissioner from the initial decision.

A notice of proposed rulemaking was published in the *Federal Register* on December 28, 1988 (53 FR 52438) and the *Official Gazette* on January 17,1989 (1098 O.G. 527). Interested parties were requested to submit written comments on or before February 27, 1989. Comments from two (2) sources were received. None of the suggestions made in the comments have been adopted. A detailed analysis of the comments follows:
Comment: The proposed rules do not go quite far enough in order to comply with 5 U.S.C. 704, which specifies that

> agency action otherwise final is final for purposes of this section whether or not there has been presented or determined an application . . . unless the agency otherwise requires by rule and provides that the action meanwhile is inoperative, for an appeal to superior agency authority.

Since no rule specifies that the initial decision of the administrative law judge shall be inoperative, a sentence should be added to the end of 37 CFR § 10.154(a) stating that pending an appeal to the Commissioner in accordance with § 10.155 the decision of the administrative law judge will be inoperative. This would assure compliance with 5 U.S.C. 704 and remove any concern by practitioners subject to disciplinary proceedings that the initial decision has any binding effect prior to action by the Commissioner.
Response: The suggestion has not been adopted since it is not necessary. The above-quoted language from 5 U.S.C. 704 first appeared as part of section 10(c) of the original Administrative Procedure Act, 5 U.S.C. 1009(c) (Act of June 11, 1946, ch. 324, § 10(c), 60 Stat. 243). The meaning of the language in that section is explained in the Attorney General's Manual on the Administrative Procedure Act (1947) at 101-05. The purpose of the language quoted in the comment was to provide for judicial review at the time when agency action becomes operative, rather than at some later time, such as when further review available in the agency became exhausted. Under the regulatory scheme for review following an initial decision in a PTO disciplinary proceeding, agency action—i.e., imposition of discipline on a practitioner before the Office — cannot become operative before 20 days after the date of entry of the Commissioner's decision under 37 CFR § 10.156(a) or, if a request for reconsideration has been filed within those 20 days, before the date of entry of the decision on reconsideration under 37 CFR § 10.156(c). In other words, the initial decision cannot become operative until such time that judicial review becomes available to the affected practitioner. The suggested change to 37 CFR § 10.154(a) is, hence, unnecessary.
Comment: The evidence upon which the General Counsel has certified to the Chief Counsel for Advocacy, Small Business Administration that this proposed rule change is not expected to have a significant adverse economic impact on a substantial number of small entities has not been disclosed to the public for review and comment.
Response: No law requires that such evidence, if any, be disclosed to the public for review and comment. *See* 5 U.S.C. 605(b). The basis for the certification was that the proposed rule changes would merely make explicit what was implicitly intended by the rules as originally constituted.
Comment: The proposed rule change will have a significant adverse economic impact on a substantial number of small entities because it prolongs the time for judicial review for a person who has been refused registration to practice before the Office.
Response: Both the proposed rule changes and the rules affected thereby relate solely to practitioners already registered or otherwise permitted to practice before the Office and who have been subject to a PTO disciplinary proceeding. The rules and rule changes have no impact, economic or otherwise, on persons refused registration or permission to practice before the Office.

Other Consideratoins

The rule change is in conformity with the requirements of the Regulatory Flexibility Act (Pub. L. 96-354), Executive Orders 12291 and 12612 and the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

The General Counsel has certified to the Chief Counsel for Advocacy, Small Business Administration that this rule change is not expected to have a significant adverse economic impact on a substantial number of small entities (Regulatory Flexibility Act, Pub. L. 96-354) because it merely makes explicit what was implicitly intended by the rules as originally constituted. Additionally, no more than a few small entities in a given year out of over 13,000 registered patent attorneys and agents and an unknown number of trademark attorneys are expected to be subject to an initial decision in a PTO disciplinary proceeding. Whatever the number of small entities, however, there would not be expected to be a significant impact on them because agency action does not take effect until after a final decision is made by the Commissioner.

The Patent and Trademark Office has determined that this proposed rule change is not a major rule under Executive Order 12291. The annual effect on the economy will be less that $100 million. There will be no major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. There will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Patent and Trademark Office has also determined that this notice has no federalism implications affecting the relationship between the National Government and the States as outlined in Executive Order 12612.

This rule change does not contain a collection of information subject to the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

§ 10.157 Review of Commissioner's final decision

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

MARKS PUBLISHED FOR OPPOSITION

The following marks are published in compliance with section 12(a) of the Trademark Act of 1946. Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. Opposition under section 13 may be filed within thirty days of the date of this publication. See rules 2.101 to 2.105.

A separate fee of two hundred dollars for opposing each mark in each class must accompany the opposition.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
